EXPERIENCE

GOOGLE OPERATIONS CENTER | CLOUD SUPPORT ANALYST

December 2022 – Aug 2023 | Knowledge Capital Sattva, Hyderabad | Onsite

- I delivered real-time call, chat, & email support to Google Cloud customers troubleshooting issues on Compute & App Engine, SQL Storage, IAP & IAM.
- I did advanced troubleshooting on Linux OS using Bash scripting and scheduled and managed automated tasks using Cloud Scheduler and developed C++ and Python scripts for virtual machines (VMs).
- I deployed VMs using templates, images, and enhanced security using Shielded VMs and firewall rules. I did data backup at Nearline, Coldline, and Archival Storage for efficient point-in-time recoveries.
- I monitored VMs with cloud monitoring agents and optimized OS & storage availability using regional & multi-regional instances.

XPHENO PVT LIMITED | TALENT ACQUISITION SPECIALIST

November 2021 – December 2022 | Bangalore, IN | Remote

- I was responsible for analyzing and sourcing IT requirements by finding the ideal candidates using Naukri and LinkedIn for clients like Adobe & MasterCard.

PROJECTS

SAFE MILO (IOS/ ANDROID) FRONT END DEVELOPER

January 2025 - April 2025 | Capstone Langara | (safemilo.wmdd.ca)

- In a team of 4 developers, We developed the front end of Safe Milo, an agile-based, AI-powered scam protection app for seniors. It offers call and scam message detection, news, alerts, quizzes, and an AI chatbot for guidance.
- Skills: React Native Expo, TypeScript, Nest JS, Jira, AWS, PostgreSQL, Prisma, Call Control, VirusTotal, OpenAI, Firebase, GCP and ESLint.

HELPMET | FULL STACK DEVELOPER | INTEGRATED PROJECT

September 2024 – December 2024 | Langara | (www.helpmet.ca)

- Helpmet is a smart injury-tracking web app that enhances workplace safety with reporting, analytics with graphs, reports, alerts, and equipment checks.
- Skills :- React, Node.js, Firebase, MongoDB, Chart.js, Tailwind, and TomTom.

ART ASTA FULL STACK DEVELOPER | LANGARA

April 2024 – August 2024 | Langara, Vancouver

- Art Asta is an online platform connecting artists and art enthusiasts through features like live auctions, bidding, maps, and purchasing local artworks.
- Skills: HTML, CSS, JavaScript, RESTful APIs, GCP, Firebase, Bootstrap, Vercel.

DJANGO BASED REAL-ESTATE WEBSITE | FINAL YEAR PROJECT

December 2019 – August 2020 | Kapurthala, Punjab, IN

- A Django, PostgreSQL-Python-based real estate website for property rentals.
